TALUS360 SEWP IV ORDERING GUIDE

Purchasing openPhoenix Solutions

Introduction

Talus360, a Women-Owned Small Business, has partnered with Affigent LLC, an Alaska Native Small Disadvantaged Business, to provide you simplified procurement solutions utilizing their SEWP IV contracting vehicle.

SEWP IV is a Government-Wide Acquisition Contract (GWAC) that offers a wide range of advanced technology products and related services to all Federal Agencies (including DoD) and their authorized contractors.

Whether you are purchasing openPhoenix for a single installation or need to set up a blanket purchase agreement to facilitate simplified agency, organization wide or geographic purchases, the SEWP IV vehicle can accommodate your needs.

What is a SEWP IV contract?

SEWP IV is the largest and most successful IT Government-Wide Acquisition Contract (GWAC) vehicle and is open for ALL Federal agencies (civilian and DOD) and their contractors. SEWP IV supports Government requirements for high-performance information technology by providing state-of-the-art commercial hardware, software, services and solutions.

- Purchase all types of latest IT hardware and software.
- Purchase installation, hosting, implementation and training services.
- Purchase consulting services in support of purchased products (10% limit).
- Low 0.45% fee. Fees capped at \$10,000 total.
- Blanket purchase agreements (BPAs) are allowed.
- Easiest and fastest order procedures
- Class C small business credit.

- Electronic Questionnaire modules for a wide variety of behavioral health measures
- Electronic Questionnaire modification and customization services
- Virtual Private Server setup and support
- Kiosk hardware and support
- Secure record access
- Electronic Reporting
- System training

SEWP IV Orders

The SEWP IV vehicle can accommodate a single installation or multi-year blanket purchases.

How does it work - Single Installation

Ordering from SEWP IV is easy. End users or Government Agencies not familiar with the SEWP RFQ process may contact Affigent or visit the NASA website at www.sewp.nasa.gov for additional information. When you're ready to discuss product configurations, call Talus360 and indicate the products you are investigating. Talus360 and

Affigent will work with you to develop a solution scope that meets your requirements.

How does it work - multiyear BPA

SEWP IV provides the option to set up a multiyear Blanket Purchase Agreement (BPAs) to streamline Talus360 procurements. Utilizing a BPA you can authorize end users within your agency, command or a geographic region to place orders as their needs arise. Replace full contract process (J&A / Full-Open / RFQ / Contracts / etc), with a Simple Quote Request. This approach significantly reduces procurement efforts for the end user allowing them to focus on their critical mission. Contact Talus360 or Affigent to learn more about setting up a BPA.

Talus360 and Affigent have done everything we can to simplify access to our state-of-the-art Behavioral Health Support solutions.

Contact Talus360 or Affigent to discuss this flexible procurement approach and how it can streamline procurement of the openPhoenix solution for your organization.
